

DO YOU NEED A COUNTER OR A NETWORK ANALYZER?

Before buying it is important to know the difference in functionality between the two devices, to verify with certainty which of the two is the one that best suits your needs. Below a simple scheme on the DIFFERENCES between the two devices:

Counter

Network analyzer

FEATURE	COUNTER	NETWORK ANALYZER
Data shown on the display	Only power and energy	All measured electrical parameters (i.e.: V, I, THD, PF), power, energy, etc.
Memory	NO. Except for the counters with Ethernet interface (Both single and three phase) which are provided with recording data memory (8MB)	YES, in most models with size up to 8 MB
Supply	Self-powered	Auxiliary power supply with different ranges depending on the model
Tarif input	YES	NO
MID certificate	MID (optional)	NO
